Developer with a background in shipping and logistics. I bring my experience of notable attention to detail, partaking in handling moving parts through production. I relish in the satisfaction of a completed project and patience that comes with it. Combining these experiences, I hope to create more ease of access applications for people across the globe.

SKILLS

- Languages: JavaScript, HTML, CSS, Python, SQL, Mongo, JSON
- Databases: PostgreSQL, MongoDB
- Libraries/Frameworks: React, Express.js, JQuery, Django, version control GIT
- Soft Skills: Customer Service, Customer relations support, Negotiations, Multilingual

PROJECTS

Taco Jump : <https://jiffylube.github.io/Taco-Jump/>

- Front end game based off of google chrome's dinosaur game
- Built using Javascript, CSS, HTML

Monster Hunter World Project : <https://friendly-pie-4f7f43.netlify.app/>

- App that allows users to fetch and present data from a database
- Leveraged embedded React, Javascript, Javascript, CSS3, HTML5, to display the visual aspects

mySelfie : <https://thunderous-cendol-805368.netlify.app/>

- Application that allows users to take selfies
- Front-end built using React.js, react routers
- Utilized a MERN stack (MongoDB, Express, React.js, Node.js) with full with full create, read, update, delete (CRUD) capabilities
