TECHNICAL COMPETENCIES

- **Languages:** HTML5, CSS3, Python, JavaScript
 - **Libraries/Frameworks:** React.JS, React Redux, Three.JS, NodeJS, ExpressJS, Django, Flask
 - **Databases:** PostgreSQL, MongoDB
 - **Management services:** Postman, Mongoose, Github, Git, Heroku, Netlify
-

TECHNICAL EXPERIENCES

General Assembly, New York, NY

Software Engineering Fellow

Feb 2022 - May 2022

- Designed user-facing projects utilizing Javascript and React.js
 - Developed full-stack web applications in a agile environment with modern tech stack including React, Python, Django, Mongodb, Javascript, HTML, CSS
 - Set up back-end website applications and databases using MongoDB, SQL, and other frameworks
 - Collaborated with diverse teams to build functional visual appealing web applications
-

ADDITIONAL WORK EXPERIENCES

Apex Logistics International, Springfield, NY

Ocean Imports Team Lead

July 2018 - December 2021

- Standardized comprehensive documents for onboarding new hires, speeding up training significantly faster by 60%
- Mentored colleagues through trainings and demos to properly utilize our platform
- Managed large-scale projects for distribution center requirements and ensured consistent routing options were readily available to clients

Ocean Imports Coordinator

August 2016 - June 2018

- Obtained certification for safe handling of hazardous materials
 - Ensured seamless transition of goods and efficient customer service for ocean imports
-

PROJECTS

Monster Hunter World Project - [Deployment](#)

- Designed a front-end web app that uses React and React hooks for reactive browsing
- Fetched endpoints on a public API to present data
- Created a basic search function to filter through rendered items

mySelfie - [Deployment](#)

- Collaborated with a team of 3 to create a web app that allows users to take selfies
- Built front-end application using React.js and React Router
- Utilized a MERN stack (MongoDB, Express, React.js, Node.js) with full CRUD capabilities

Hater - [Deployment](#)

- Created a Twitter clone with a team of 10 fellow engineers
 - Restructured CSS layouts into more organized formats for conflicting page components
 - Utilized Django and MySQL for the deployed back-end
-

EDUCATION

General Assembly, *Software Engineering Immersive* | New York, NY | March 2022 - May 2022

New York City College of Technology, *Electrical Engineering* | New York, NY | August 2009 - June 2011
