Full-Stack Developer with a background in shipping and logistics. I bring my experience of notable attention to detail, partaking in handling moving parts through production. I relish in the satisfaction of a completed project and patience that comes with it. Combining these experiences, I hope to create more ease of access applications for people across the globe.

SKILLS

- Front-End: React.js, JavaScript, HTML, CSS, Python
- Back-End: Heroku, MongoDB
- Libraries: PostgresSQL, Django, Express.js, Node.js
- Version control utilizing GIT

EXPERIENCE

General Assembly, New York, NY
Software Engineering Fellow, March 2022 - May 2022
- Designed user facing projects utilizing Javascript and React.js
- Set up back-end website applications, and setup databases using MongoDB, SQL, with other frameworks.
- Collaborated with small teams for building acceptable products within allotted deadlines.
- Managed version control technology for self and group projects with Git and GitHub.

Apex Logistics International, Springfield, NY
Ocean Imports Team Lead, July 2018 - July 2021
Ocean Imports Coordinator, August 2016 - June 2018
- Provided cross country shipping solutions to ensure customer deadlines are met.
- Managed large scale projects for distribution center requirements, and ensured consistent routing options are readily available.
- Handled numerous Dangerous Goods shipments, DG certified.
